

International Journal of Medical Sciences Special Issue on Second Primary Cancers (SPCs)

Special Issue Editor:

Prof. Dr. Chi-Chang Chang

Chung-Shan Medical University, Taiwan

changintw@gmail.com

Focus

The effectiveness of cancer screening and therapies has resulted in an increase in the number of diagnosed second primary cancers (SPCs) throughout the world. Today, the situation of cancer survivors with SPCs is of increasing relevance and importance. Apart from many reports in the literature on the frequency of SPCs, the treatments of second primary cancers are still a tough challenge of therapeutics and clinical risk management. Medical informatics is an interdisciplinary and scientific field. Currently, it deals with develop and apply advanced methods in order to better understand and to improve health care, which via the diagnosis, treatment, and prevention of cancers, illness, injury, and other physical and mental impairments in human beings. This special issue spans theoretical, practical, and technical issues in medical informatics and SPCs. Research on applications of prevention, prediction and prognosis topics are appropriate for this special issue. Practical experiences and experiments in using artificial intelligence technologies and medical information technologies are also welcome.

How to Submit

Please contact Guest Editor Prof. Chi-Chang Chang changintw@gmail.com to let know, you are going to submit a paper to Special Issue.

After that feel free to register at our paper processing system:

<https://www.medsci.org/ms/submit?initype=new> and

submit your paper: <https://www.medsci.org/ms/submit?subgroup=ccchang>

All papers will go through the International Journal of Medical Sciences high standards, quick, fair and comprehensive peer review procedure. Instructions are available at

Journal webpage: <https://www.medsci.org/ms/author>

In case of any questions please contact Guest Editor **Prof. Chi-Chang Chang**
